Emerging market investments involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, from economic or political instability in other nations or increased volatility, and lower trading volume. The value of an investment denominated in a foreign currency could change significantly as foreign currencies strengthen or weaken relative to the U.S. dollar.

Some Funds are non-diversified and, as a result, may have greater volatility than diversified funds. Some Funds will concentrate investment in issuers of one or more particular industries to the same extent that the underlying index is so concentrated. Concentration risk results from maintaining exposure to issuers conducting business in a specific industry. Diversification does not ensure a profit or protect against a loss.

EGShares Funds ("Funds") are distributed by ALPS Distributors, Inc. Emerging Global Advisors acts as the investment adviser to the EGShares Funds. Emerging Global Advisors and ALPS Distributors, Inc. are unaffiliated entities.
